PROFESSIONAL SUMMARY

Platform / DevSecOps Engineer with hands-on experience building and deploying full-stack applications and containerized systems. Strong focus on Docker-based workflows, backend architecture, and production-ready deployments. Experience extending into secure AI systems (LLM Ops), including prompt security, data protection, and output validation. Currently deepening skills in Kubernetes, CI/CD pipelines, and Infrastructure as Code to design scalable and reliable systems.

TECHNICAL SKILLS

DevOps / Platform:	Docker, Docker Compose, Linux, CI/CD (Basics), Terraform (Basic), Container Debugging
Security / DevSecOps:	Prompt Injection Defense, PII Redaction, Output Validation, Secure API Design
GenAI / LLM Ops:	OpenAI APIs, LangChain, RAG Pipelines, Vector Databases, Prompt Engineering
Backend:	Node.js, Express.js, REST APIs, Authentication
Frontend:	Next.js, React, Tailwind CSS
Databases:	MongoDB, PostgreSQL, MySQL
Languages:	JavaScript (ES6+), Python, C++

EXPERIENCE

Web Development Intern	Gigadevelopers, Haripur
- Contributed to development and deployment of full-stack applications. - Collaborated with team members to debug and improve real-world systems.	

PROJECTS

AppTracker (Dockerized Full-Stack Application)

- Built and containerized a full-stack application using Docker.
- Managed PostgreSQL and MongoDB containers.
- Focused on backend patterns and deployment debugging.

NeuroGastronomy AI (GenAI & LLM Ops)

- Built enterprise LLM system using RAG pipelines.
- Implemented prompt injection defense, PII redaction, and output validation.
- Tech: Next.js, OpenAI, LangChain, Vector DB

Lumix Commerce (Headless E-Commerce Platform)

- Developed scalable headless commerce system using Next.js.
- Integrated performance optimizations and payment workflows.

EDUCATION

BSc Computer Science	2024 – Present
University of Engineering and Technology (UET)
